FOREWORD Our new brand identity guidelines that were launched in 2017 represent a new step for Dewesoft. We have begun to promote Dewesoft on a higher level by increasing brand awareness all over the globe. Our goal is to increase familiarity of our brand and its name. We want people to become aware of our brand and its meaning. We would

like to reach the top-of-mind awareness in our industry and build strong reputation and relationship with our customers while offering the best products in combination with best customer service possible.

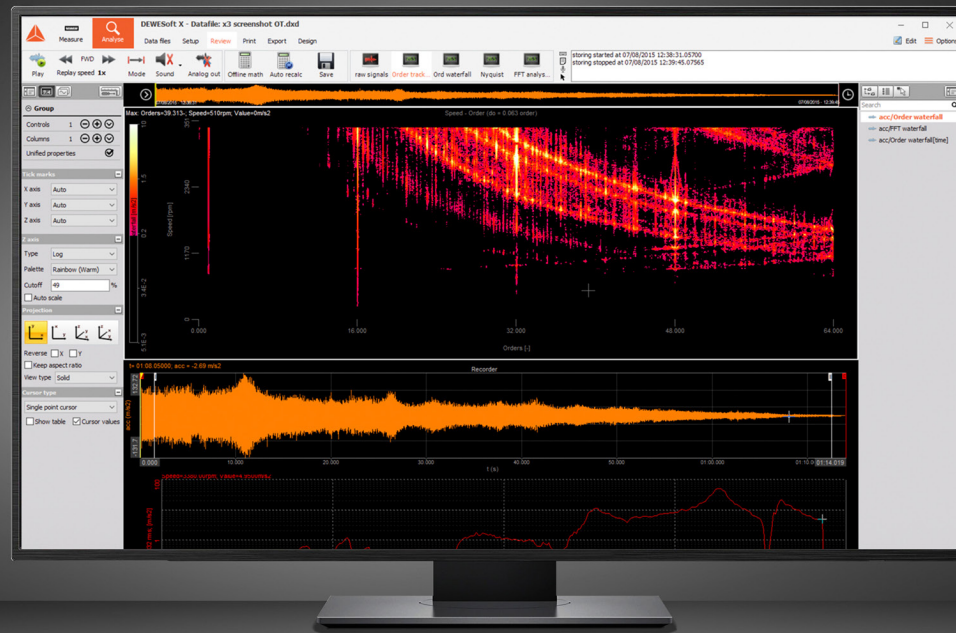

MESSAGE FROM THE PRESIDENT This initiative to improve our brand strength has been spearheaded by company leadership. To quote our President, Dr. Jure Knez : "Being the part of Dewesoft is a big part of our lives. It's not just a job – it's a way of life. Working hard and watching the company develop and grow to a stage where it is today has been a

pleasure and a privilege. Dewesoft is made of people standing behind our product and services. The people of Dewesoft have brought us to being a global company serving most prominent customers. This brand guide will help us to establish the name Dewesoft even further. It is an important part to build global company awareness, so use it consistently."

OUR BRAND Dewesoft is a best-in-class provider of data measurement devices. What distinguishes our approach is the human element. While most companies design tools starting with the device and ending with the user experience, we take the opposite approach. We design our products, starting with the experience that our users require. We then construct the hardware and software around the outcome of delivering the fastest, most efficient, most intuitive user experience possible. We don't just manufacture machines; we engineer moments that elevate your businesses' understanding of a particular learning outcome. We have designed our visual identity to convey the main principles of

the user experience: robust, but yet simple and recognisable. Orange, a colour of creativity, success and encouragement, has been combined with black to represent strength and elegance. The triangular shape of our logo represents three main groups that contribute to our success: Customers, Partners and Team members. Our brand represents a commitment to serving the needs of our valuable customers to whom we are always trying to offer the best possible test and measurement solutions as well as expectation-exceeding service on all levels, from sales to technical support.

MISSION Our mission is to provide the most insightful test and measurement experience by working in close collaboration with our valuable customers. We will work hard to deliver a best in class service by intently listening to our customer's needs and then translating them into measurement solutions that inspire genius.

VISION The cornerstone of our vision is simplicity. We provide an intuitive user interface that integrates seamlessly with all hardware, creating an optimal measurement experience for any application. Our

vision is duofold: we strive to both stay the best in what we do today while expanding the range of possibility by looking forward to what the future holds for our clients, the industry, and the global markets at large.

COMMITMENT Dewesoft's team offers on the ground support across the globe to provide the best possible local service and support. We take care of the logistics so that you can focus on what you do best: forming intelligent conclusions using the data you've acquired.

SuperCounter®
DualCoreADC® DS-NET™ GrandView®

TRADEMARKS We take pride in our products and we take care that all key products and technologies are registered as trademarks all over the world. The Dewesoft name is a registered trademark. Product families (KRYPTON, SIRIUS, DSI, DS-NET) and technologies (DualCoreADC, SuperCounter, GrandView) are registered trademarks as well. When used

as logo or as part of any graphic material, the registered trademark sign is used as a part of logo. When used in text representing the company, product or technology name, the ® sign is not used. The Dewesoft triangle logo is a registered trademark but the ® sign is not used in visual representation of the triangle logo.

BRAND IDENTITY ELEMENTS

COLOR PALETTE

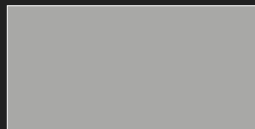

BLACK, WHITE, ORANGE These three colors represent the visual basis of the Dewesoft Company. The distinctive Dewesoft orange signal color placed on Dewesoft Black or White completes the foundation of the general Dewesoft motif.

TYPOGRAPHY

MYRIAD PRO Using a default font is an important piece of a complete and continuous visual structure. Dewesoft's primary and only font is the Myriad Pro set of fonts.

COMPANY NAME When used in logo the "DEWE" part of the company name is written in Myriad Pro Semibold font and the "Soft" and "measurement innovation" part of the name in Myriad Pro Regular.

This font should be used in all publications, visual and commercial materials and all other materials issued by Dewesoft company and by other companies using Dewesoft's name.

In document formation, Dewesoft should be written in regular type of font with the first letter capitalized. Example : "Dewesoft is a best in class provider of data measurement devices."

REGULAR

We develop and manufacture versatile and easy to use data acquisition instruments - ultimate tools for every test&measurement engineer.

SEMIBOLD

We develop and manufacture versatile and easy to use data acquisition instruments - ultimate tools for every test&measurement engineer.

DEWESOFT BRANDMARK Dewesoft's brandmark is the mark that customers trust. It is more than just a 3-part-triangle. It is the symbol of the company's characters. Wherever the logo is presented, it must look the same, to present a stable and trustworthy brand. The 3-part-triangle separated by white space represents three main groups that contribute to our success: Customers, Partners and Team members.

BRANDMARK CONSTRUCTION The Dewesoft brandmark is designed out of an elypse shape in a 1:4 ratio. Three identical ellipses are rotated at the same center point to 0°, 60° and -60° degree angles which form the outer curve of each triangle. The angles of the inner mid-spaces are set to 60° degrees from the x-axis. The mid-spaces between all the triangles are one tenth of the x variable apart.

TYPE A

TYPE B

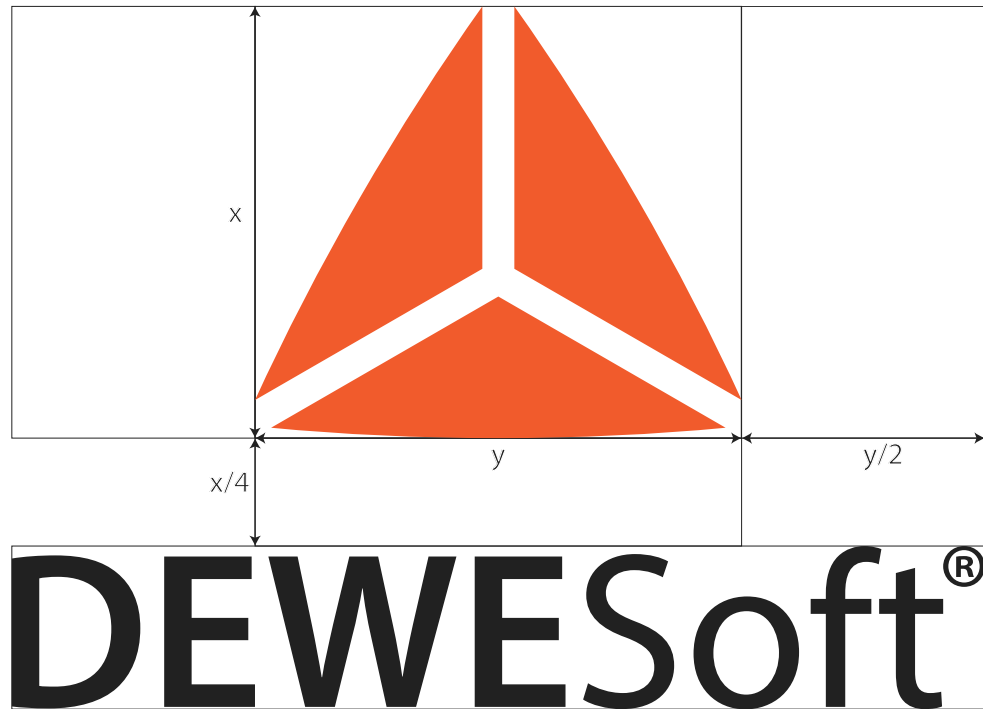

PRIMARY LOGO Although Dewesoft has a few different variations of its logo, only one is considered primary. It consists of the company brand-mark, company name and tagline in a horizontal format. Type A: When used on white background the brand mark is in DS Orange color and the company name and tagline in Black. Type B: When using logo on dark background the background should be in DS Black color. The brand mark is DS Orange and the company name and tagline in White (for more information on colors see chapter “Color Palette” on page 9). Both rules apply to all versions of the Dewesoft logo.

LOGO SET-UP The Dewesoft logo has two different set-ups, vertical and horizontal, both of which have two variations: 1) including the company name only and 2) including company name and slogan.

VERTICAL The variable X describes the logo sign height, and variable Y informs as to the width. The text stretches over the logo two X values long, and is centered to the logo $X/4$ value below the sign. The same rule applies for both of the variations.

HORIZONTAL The variable X describes the logo sign height, and variable Y describes the width. The text is the same height as the logo sign and is set $Y/2$ to the right side of the logo sign (the same rule applies for both of the variations).

DEWESoft®

DEWESoft®
measurement innovation

LOGO VARIATIONS There are two types of Dewesoft logo alignments: horizontal and vertical. Both of them have two variations:

VERTICAL The vertical logo is similar to the horizontal setting except the brandmark is centered on top, followed by the company name centered below the sign.

HORIZONTAL The horizontal logo is longer in width and shorter in height. It consists of the Dewesoft brandmark followed by the company name to its right side.

DEWESoft[®]
measurement innovation

DEWESoft[®]

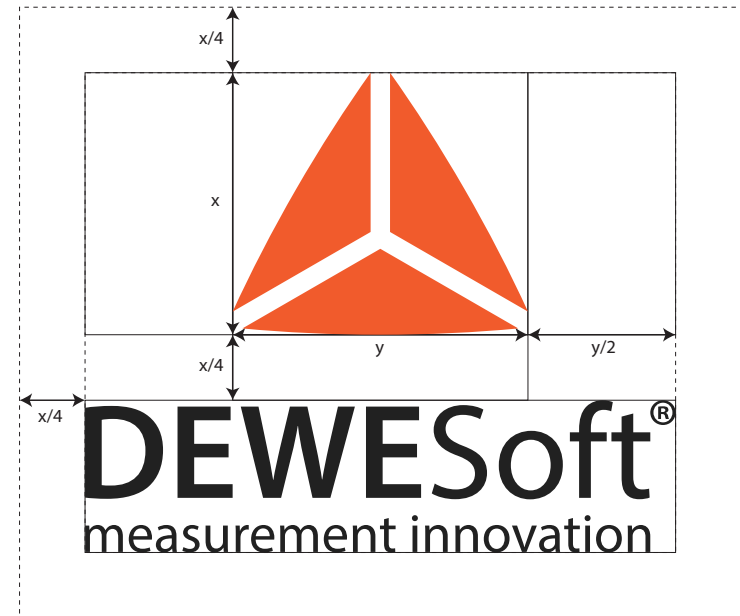

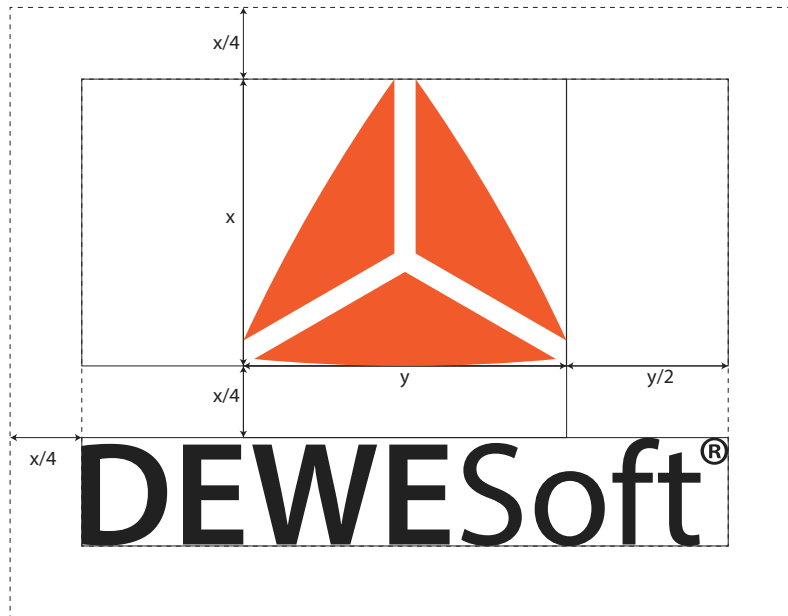

MARGINS The Dewesoft logo has to be used in a fashion that reflects its image consistently and as such should only be used with appropriate amount of free space around it.

HORIZONTAL Empty space around logo should be half of the brand-mark height on top and bottom and half of the brand-mark width on both sides.

VERTICAL Vertical logo should have a quarter of the brandmark height space empty around the whole area of the logo.

BACKGROUND COLORS There are several options when putting logo on different background colours. Please follow the guidelines above.
